

Comparative BI Benchmarking & Case Insights

Case Study 1: Nestlé India Industry: Food Processing / FMCG BI USE CASE & IMPLEMENTATION Nestlé implemented automated supply chain dashboarding to combat raw material waste and streamline factory-to-distributor expiration tracking, providing complete operational transparency. CORE KPIS TRACKED Inventory Turnover Ratio Batch Expiry Velocity Days Inventory Outstanding (DIO) STRATEGIC DECISION INFORMED The centralized dashboards empowered operational managers to dynamically adjust factory batch production schedules based on regional ingredient expiry rates, cutting localized inventory spoilage significantly. Source Validation: Tableau BI Knowledge Repository	Case Study 2: BigBasket (Innovative Retail Concepts) Industry: Online Grocery Retail / Food Logistics BI USE CASE & IMPLEMENTATION BigBasket deployed predictive analytics pipelines to systematically manage warehouse stock levels for highly perishable items, including fresh agricultural produce and organic pulse batches. CORE KPIS TRACKED Freshness Index Waste Value Sourcing Leakage Stockout Frequency STRATEGIC DECISION INFORMED The models enabled procurement algorithms to dynamically trigger automatic reorders from hyper-local farms based on real-time consumption patterns and shelf-life variables, balancing freshness and availability. Case Study 3: Paper Boat (Hector Beverages)

Industry: Traditional Beverage Processing

BI USE CASE & IMPLEMENTATION

Paper Boat integrated operational BI frameworks to systematically map out upstream supply chain inefficiencies across raw ingredient suppliers during volatile, seasonal high-demand periods.

CORE KPIS TRACKED

Supplier Lead Time

On-Time In-Full (OTIF) Delivery Rate

Batch Yield Extraction Variance

STRATEGIC DECISION INFORMED

The intelligence generated empowered management to optimize procurement contracts by shifting bulk seasonal orders away from low-shelf-life suppliers toward highly reliable, high-yield vendors.
